Re: Waste Disposal Site

Dear Residents,

Disposal of your household waste is a privilege and not a right.

Treating the disposal site as a landfill may result in losing the use of the site.

The bins once full, are off limits until they have been replaced with empty bins by OSS. The call goes to OSS when the bin is $\frac{3}{4}$ full and we are put on a waiting list for the next available replacement. We cannot call until they are full, OSS will not replace half full bins.

These bins have full lines on them and piling 3 to 4 feet over the line or simply piling on the ground is not acceptable.

Garbage piled on the ground is in violation of our permit to have the waste disposal site. The Ministry of Environment could revoke our permit.

All construction material is not accepted in the bins at our site, that must be taken to the Yorkton landfill. It is a violation of our bylaw and offenders will be fined.

Please respect the Waste Disposal Site to continue to have it available to you.

Thank you.
